WARNING**CONSULT YOUR PHYSICIAN**

CONSULT YOUR PHYSICIAN BEFORE STARTING YOUR EXERCISE PROGRAM. IT IS ADVISABLE TO HAVE A PHYSICAL EXAMINATION BY YOUR PHYSICIAN BEFORE YOU ENTER ANY EXERCISE PROGRAM.

FOR YOUR OWN SAFETY, DO NOT BEGIN ANY EXERCISE PROGRAM WITHOUT A TRAINING PARTNER IN ATTENDANCE. SET UP YOUR PROGRAM TO ACCOMMODATE TWO PEOPLE AND YOU WILL BE HIGHLY MOTIVATED.

TRAIN WITH A PARTNER

IT IS RECOMMENDED THAT AN INDIVIDUAL SHOULD NOT WORKOUT WITHOUT A TRAINING PARTNER IN ATTENDANCE. SET UP YOUR PROGRAM TO ACCOMMODATE TWO PEOPLE AND YOU WILL BE HIGHLY MOTIVATED.

STEP 1 - FRAME ASSEMBLY

Begin by inserting 2 SQUARE PLASTIC CAPS (D) into UPRIGHT (1). Align bolt holes in L-BRACKET (11) with holes in UPRIGHT (1) and secure each bracket with 2 HEX HEAD BOLTS (M) and 2 LOCK NUTS (J). Insert ROUND PLASTIC CAP (B) into each end of WEIGHT STACK PINS (12), insert pins into UPRIGHTS (1) and secure with HEX HEAD BOLT (H) and LOCK NUT (J). Align holes in main frame front u-bracket and FRONT SUPPORT (3). Secure with 2 HEX HEAD BOLTS (H) and LOCK NUTS (J). Secure rear u-bracket on MAIN FRAME (2) to crossbar of UPRIGHTS (1) using 2 HEX HEAD BOLTS (H) and LOCK NUTS (J). Insert 2 SQUARE PLASTIC CAPS (E) into FRONT SUPPORT (3). Tighten all bolts.

NOTE: The lower or attachment end of the BACKREST (5) can be identified quickly by the LONG ANGLE IRONS (10). The LONG ANGLE IRONS (10) will be extended approximately two inches beyond the BACKREST PAD (5).

STEP 2 - BACKREST PREPARATION

Turn BACKREST (5) over to expose work area. Both LONG ANGLE IRONS (10) have been fastened to BACKREST (5) for shipment. One long angle iron must be loosened in order to assemble BACKREST (5) to main frame pivot rod. The lower MACHINE SCREW (K) must be removed while the upper MACHINE SCREW (K) is only loosened. The LONG ANGLE IRON (10) can now swing freely from the lower end of BACKREST (5).

DETAIL A

STEP 3 - ATTACHING BACKREST & SEAT

BACKREST: To aid in attaching backrest, first slide the BACKREST ADJ. BAR (9) through one of the hole patterns in the uprights. With LONG ANGLE IRON (10) free, lower BACKREST (5) to main frame pivot rod. Slide the secured LONG ANGLE IRON (10) onto one side of pivot rod. Swing the free LONG ANGLE IRON (10) back to its original position and onto the opposite end of the pivot rod. See Detail A. Replace MACHINE SCREW (K) that was removed in Step 2 and tighten all machine screws.

SEAT: With SEAT (6) right-side up, lower SEAT (6) to seat brackets on main frame. Align bolt holes and fasten with 2 MACHINE SCREWS (K). Tighten all machine screws.

STEP 4 - ATTACHING LEG CURL

Place LEG CURL (4) between leg curl brackets on main frame and align bolt holes. Secure with HEX HEAD BOLT (F) and LOCK NUT (G). Repeat the following instructions until all PAD BARS (7) and FOAM PADS (8) are in place.

First slide PAD BAR (7) through proper hole in LEG CURL (4) until equal amounts of bar are on both sides of LEG CURL (4). Slide one FOAM PAD (8) onto each end of PAD BAR (7). Insert SQUARE PLASTIC CAP (E) into end of LEG CURL (4). Use LOCKING PIN (L) to lock leg curl to main frame for doing specific exercises.

STEP 5 - ARM CURL

Assemble arm curl by aligning holes in BRACKET (14) with holes in ARM CURL BAR (15). Secure with 2 HEX HEAD BOLTS (N) and LOCK NUTS (J). Attach completed assembly to arm curl pad using 3 ROUND HEAD SCREWS (K). Insert SQUARE PLASTIC CAP (O) into each end of BAR (15).

To use arm curl, mount it to upright by inserting long ear of bar holder into slots in arm curl bar.
